V3i Regional Specials may be available in your area!

LOOP SELECTION

V3 owners asked for it. Here it is! Reliable depth information with all your accessory search coils!

LANGUAGE

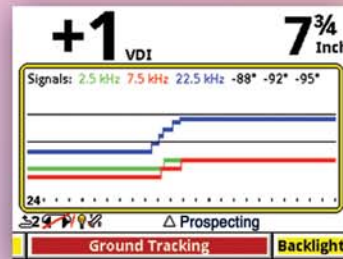

Spanish, German, Russian, Turkish, French and English

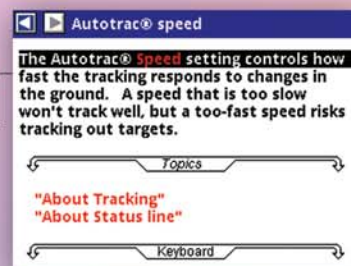

PROSPECTING ANALYSIS SCAN

This scrolling graph shows changes in the ground minerals as you sweep to indicate gold-bearing areas. Highly mineralized areas signal GOLD!

ON-BOARD QUICK REFERENCE GUIDE

A built-in instruction manual! Now, help is just a keystroke away. Valuable info. at your fingertips for every feature.

SOIL TYPE SELECT

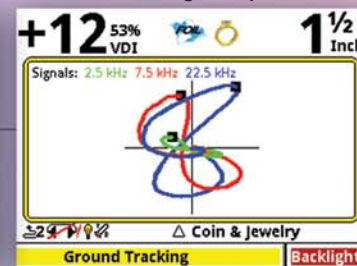

Get the performance edge ... even in bad ground! Choose Normal or Salt and tailor ground rejection to the type of soil.

Straight Line Target Response

Scrambled Target Response

A revolutionary new way to ID targets using the accuracy of White's multifrequency analyzation. See the phase and strength of each frequency. Smooth, straight positive lines indicate a likely good target. Scrambled responses are likely iron.
